

Keeping your customers satisfied is paramount to your business success

You need to control your costs without compromising the delivery of your customers' Global Transit Network

// Our solution can adapt quickly, within 24 hours, to meet the changing needs of you and your customers. //

What is VTLWaveNet IP Transit?

VTLWaveNet IP Transit is a wholesale Internet access service with full connectivity to the VTLWaveNet IP network, the VTLWaveNet Tier 1 transit providers and VTLWaveNet's direct peering arrangements.

VTLWaveNet uses carefully selected partners to provide you with the right long-term solution for your global transit needs, giving total reliability and scalability.

We provide a superior, constantly monitored and supported service that will meet your and your customers' requirements and ensures you receive total customer satisfaction.

Our solution can adapt quickly (within 24 hours) to meet the changing needs of both you and your customers, enabling you to maintain a high level of service whilst controlling your costs.

Is it right for you?

VTLWaveNet's IP Transit is right for your business if you:

- Need the best global connection possible
- Want the flexibility to increase capacity within 24 hours
- Would like to control costs without impacting the quality of service
- Require 24x7x365 technical support
- Want a dedicated service manager providing assistance when needed
- Want a project manager who will manage all aspects of the installation of your service
- Want a totally dependable service for your customers

What do you get?

- 10/100/1000Mbps Ethernet access to the VTLWaveNet IP Transit service
- A Network Operations Centre (NOC) that provides 24x7x365 monitoring and technical support
- Wide coverage across VTLWaveNet's European long distance and Transatlantic network and metro footprints
- The ability to increase capacity within 24 hours
- Access to our Tier 1 providers covering all areas of the globe, combined with our low latency peering arrangements with the best partners

What's in it for you?

Best connection routes possible – we have reliable direct peering arrangements and use the best Tier 1 providers to cover all areas of the globe, ensuring you of a reliable and high quality IP transit service.

Choice of pricing plans – select the plan that best suits your needs and budget and helps you to control your costs. VTLWaveNet can offer a discounted price structure to customers who are able to commit to a higher capacity.

Capacity changes within 24 hours – we will react quickly to your changing needs, so you will be able to react quickly to your customers' requirements, keeping them satisfied.

Scalable as your business grows – VTLWaveNet's service is very scalable. On the fast Ethernet connection, the IP Transit service is available in 10Mbps increments. On the Gigabit Ethernet connection, the IP transit is available in 50Mbps increments. This scalability future-proofs your client offering.

Superior service and support – Gives you total reliability and peace of mind.

Why choose VTLWaveNet?

Understanding – our services will fit with your business. Which means we'll always focus on what you need, not what's easiest for us.

Business Allies – we're focussed solely on the wholesale market and we're here to support your business. We are an agile organisation and will respond quickly.

Network – we operate an extensive European long distance network and metro networks in the main European business centres.

Reliability – our Network Operations Centre monitors and manages your service around-the-clock, 365 days a year, ensuring it stays up and running.

Support – we have a highly skilled support team who continuously monitor your service and proactively correct faults. We offer the service performance your business needs coupled with the customer experience you'd expect. So if you ever have any problems, we're never more than a phone call away.

Flexible – all our services are scalable and can grow with your business. We can combine services from our connectivity, Co-location, IP Transit and Dark Fibre portfolios to provide a flexible solution.

Strength – we have great people who care about customer service, who make a point of being transparent in their actions, frank in their advice, and accountable for VTLWaveNet's performance at every stage.

Value – we have invested in a very efficient infrastructure and run an organisation with little overhead. We combine all of the quality above with very attractive pricing.

About us

VTLWaveNet provides highly scalable telecommunications services across Europe. We operate an extensive European long distance network and metro networks in the main European business centres, accessing carrier houses, data centres and the main Internet exchanges.

Because we own the underlying physical infrastructure and equipped the network with the latest high capacity optical DWDM technology and multi service platforms, we can offer these services fast, very cost-effectively and at all speeds required.

With services ranging from Dark Fibre and Co-location to high bandwidth Wavelengths and Ethernet VPNs, we have a suitable solution for companies requiring different levels of control over their European or city networks, regardless of the size of their network, and whether building from scratch or adding to an existing network.

We think differently at VTLWaveNet. We listen to our customers, make a point of understanding their needs, and deliver a service that is right for them, not most convenient for us.
